

SNP CUSTOM CODE MANAGEMENT

SNP CUSTOM CODE MANAGEMENT

In order to remain competitive, client-specific developments, known as Custom Codes, are often absolutely essential in business processes. If they are not used, however, maintenance, testing, and documentation costs can quickly exceed the IT budget. In many cases, the stability, performance, and complexity of your SAP systems are significantly impaired by the effects of the often unused Custom Code.

With two decades of experience carrying out projects, SNP AG and its experts have the answers to this and other problems: Use our expertise to reduce the risks from customer developments at your company.

We're here for You when ...

- there is a lack of transparency at your company regarding customer developments in SAP systems and their level of usage
- you are struggling to deal with hard and sloppy modifications and add-ons in SAP Standard
- you lack an overview of the criticality of customer developments in business processes
- uncertainties exist with regard to upcoming upgrades as they pertain to possible effects on the Custom Code
- a high level of maintenance activities in conjunction with high maintenance costs are putting a strain on your budget
- development processes are incomplete or inadequately defined
- your company does not have quality control processes for customer developments
- the basis requirements for carrying out clearing projects are lacking
- you have made the decision to return to SAP Standard
- uncertainties exist with regard to the approach for reducing Custom Code
- you already use tools and methods for Custom Code Management also when you plan to use them in future.
